Boise, ID – (760) 391-2345 – jadec.jcdc@gmail.com – [Portfolio Website](#) – [Linked in](#)

Education

B.S. Games Interactive Media and Mobile Technology (09/2024 - Expected 05/2028)

Boise State University

Projects

- Created an AI-Powered Website using HTML, CSS, and Node.js to connect user input to ChatGPT; made it responsive for all devices and added visual validation for the form elements.
- Worked on a team Unity project creating an AR game. Created many of the visuals/sprites and animations using Adobe Photoshop, Illustrator, and Animate, and oversaw the visual aesthetic of the project.
- Created an interactive comic in Unity with a small group of people to tell a story explaining whether the universe is random or a simulation. Made concept art for the main character and some background settings using Photoshop and many of the finalized panels with Illustrator; also oversaw the visual aspect of the project remained consistent.
- Made an environment showcase in Unreal Engine 5; worked with natural landscapes and utilized lighting, textures, and Photogrammetry to make the project fit the Jurassic Period aesthetic I was going for.
- Created concept art and a story for a character based on a simple premise. Used Photoshop, Illustrator, and Procreate to achieve the looks I desired for the illustrations.
- Created a logo design for a non-existing company using the principles of design.
- Created the basic concept for an animated logo of an imaginary company; used Photoshop and Illustrator for the still illustrations and used Adobe Animate for the final draft of the animation.
- Made a 2D platformer game using Unity and C#; created basic graphics, different movement options, collectibles, and a short animation to establish a story for the game.
- Revamped the look of the mobile version of a family-owned website; using prototyping and testing to make sure the interface was intuitive and using Illustrator and Powerpoint to make a polished final prototype of the look.

Experience

Classroom Support Specialist: 10/21/25 – Present
